Flutter

- Use auto format document
- Follow [this](#) style guide

Python

- Adhere to [PEP8](#) style guide.
- Must pass *pylint* with 10/10
- [Docstrings](#) e.g.

```python
def bar(num):
    """
    bar() does _____
    Args:
        num (int): a number
    Returns:
        retVal (boolean): whatever
    """
```

or for shorter or less important functions, you can do a one line like so:

```python
    def bar(num):
        """ bar() does _____ and takes num """
```
